29TH - 30TH APRIL, 2024

INSURTECH AND THE FUTURE OF INSURANCE

Modern trends and technological advancements in insurance and reinsurance

COURSE OVERVIEW

This course offers a deep dive into the latest trends, technological advancements, and governance and ethics practices within the insurance and reinsurance industry. Designed for professionals looking to enhance their expertise, it covers global and regional developments, cutting-edge technologies like telematics and AI, and the critical importance of ethical governance in insurance operations.

COURSE OBJECTIVES

Global Insurance Overview: To equip participants with an understanding of the global insurance market's structure and key influencers to identify trends and their impact on insurance practices.

Regional Market Insights: To provide analyses of regional insurance market dynamics, highlighting opportunities and challenges to refine global insurance strategies.

Reinsurance Trends: To examine recent shifts in reinsurance, including market consolidation, catastrophe bonds, and alternative risk transfers, and their effect on risk management.

Innovative Insurance Models: To showcase global case studies of innovative insurance models, emphasizing the use of technology to meet market demands and improve risk management.

Professional Application: To motivate participants to apply webinar insights to their professional roles, focusing on innovative insurance and reinsurance strategies.
